Professional Summary

B.Sc. Data Science student with proven expertise in **SQL, Python, Power BI, and Excel**, transforming raw data into actionable business insights. Hands-on experience in **exploratory data analysis, customer segmentation (RFM), and interactive dashboard development**. Proficient in **data cleaning, statistical analysis, and visualization** using Pandas, NumPy, Matplotlib, Seaborn, and DAX. Passionate about leveraging data-driven solutions to solve real-world business problems and drive strategic decision-making.

Technical Skills

Programming Languages: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL, R
Business Intelligence: Power BI (DAX, Power Query), MS Excel (Advanced Functions, Pivot Tables, Data Analysis)
Data Analytics: Exploratory Data Analysis (EDA), Statistical Analysis, RFM Analysis, Data Cleaning & Wrangling
Visualization Tools: Power BI, Matplotlib, Seaborn, Excel Dashboards
Data Management: Data Warehousing, ETL Processes, Database Management
Other Skills: Machine Learning Basics, Predictive Modeling, Data Storytelling, Critical Thinking

Key Projects

Olist E-Commerce Exploratory Data Analysis (EDA) | *Python, Pandas, Matplotlib, Seaborn* 2025

- Conducted comprehensive EDA on **100K+ transactions** from Brazilian e-commerce platform Olist, uncovering key sales trends, customer behavior patterns, and product performance metrics
- Performed advanced **data cleaning and preprocessing** on 8+ datasets, handling missing values, outliers, and merging relational tables to create a unified analytical dataset
- Analyzed **customer purchase patterns, order delivery times, and payment methods**, identifying that credit cards accounted for 75% of transactions and revealing peak sales periods
- Created **20+ data visualizations** (correlation heatmaps, distribution plots, time-series analysis) to communicate insights on revenue trends, geographic sales distribution, and product category performance
- Derived actionable business insights including optimal pricing strategies, inventory management recommendations, and customer satisfaction improvement areas based on review scores analysis

RFM Customer Segmentation Analysis | *Python, Pandas, SQL, Power BI* 2026

- Developed **RFM (Recency, Frequency, Monetary) segmentation model** to categorize customers into strategic groups, enabling targeted marketing campaigns and improving customer retention strategies
- Analyzed customer transaction data to calculate RFM scores, identifying **Champions, Loyal Customers, At-Risk, and Lost Customers** segments representing different value tiers
- Implemented **data-driven customer scoring system** using Python, automating the segmentation process and reducing manual analysis time by 80%
- Built interactive **Power BI dashboard** showcasing customer distribution across segments, lifetime value metrics, and segment-specific KPIs, enabling stakeholders to make informed marketing decisions
- Delivered strategic recommendations for personalized marketing campaigns, resulting in potential **30% improvement in customer engagement** and optimized marketing budget allocation

Education

Swami Ramanand Teerth Marathwada University (SRTMU), Nanded August 2024 – July 2027
Bachelor of Science in Data Science Nanded, Maharashtra

Certifications

Tata Group - Data Visualisation: Empowering Business with Effective Insights | *Forage* 2025

Accenture North America - Data Analytics and Visualization Job Simulation | *Forage* 2025

Career Essentials in Data Analysis | *Microsoft & LinkedIn* 2024

Additional Information

Languages: English (Professional), Hindi (Native), Marathi (Native)
Interests: Machine Learning, Big Data Analytics, Real-time Data Processing, Data-Driven Problem Solving
Soft Skills: Analytical Thinking, Problem Solving, Communication, Team Collaboration, Continuous Learning
